SOURCE OF POPULATION
Social and Cultural Tables, C-14: Population by five-year age group, residence, and sex (https://www.censusindia.gov.in/); estimated from 2001 and 2011 census data by the difference distribution method using an exponential growth rate (Takiar and Shobana, 2009).

SOURCE OF POPULATION
For 2008 and 2009, populations were estimated with the interpolation method based on the 2005 and 2010 census data of Hiroshima Prefecture. For 2010, the census population was used. For 2011 and 2012, populations were estimated with the extrapolation method based on the 2005 and 2010 census data.

NOTES ON THE DATA
†C67 (bladder cancer) includes neoplasms of uncertain or unknown behaviour together with invasive cancers.

Average annual person–years by sex and age group

SOURCE OF POPULATION
Based on data from Statistics Korea, using a mid-year population, calculated as the average population of two consecutive years; for example, 2010 mid-year population estimated as (population at end of 2009 + population at end of 2010)/2.

Philippines, Manila (2008–2012)
Average annual person–years by sex and age group

SOURCE OF POPULATION
Provided by the Philippine Statistics Authority, based on the 2010 census, making allowances for births and deaths, but it was not possible to estimate migration into and out of the registration area.

NOTES ON THE DATA
*No official mortality data. †C67 (bladder cancer) includes neoplasms of uncertain or unknown behaviour together with invasive cancers.

20 major cancers, ASR (World) per 100 000

Average annual person–years by sex and age group

SOURCE OF POPULATION
French National Institute of Statistics and Economic Studies (http://www.insee.fr). Mid-year populations (age at last birthday), estimated from populations at 1 January (two data source files: *Estimations localisées de population 1975–2008* and *Projections Omphale 2009–2042*). Mid-year population provided by department, sex, age, and calendar year up to 2012.

France, Somme (2008–2012)
Average annual person–years by sex and age group

SOURCE OF POPULATION
French National Institute of Statistics and Economic Studies (http://www.insee.fr). Mid-year populations (age at last birthday), estimated from populations at 1 January (two data source files: *Estimations localisées de population 1975–2008* and *Projections Omphale 2009–2042*). Mid-year population provided by department, sex, age, and calendar year up to 2012.

SOURCE OF POPULATION
Based on data provided online by the statistical service of the Administration of the Emilia-Romagna Region. The data, originally collected by the population registries of the 348 municipalities of the region, are updated every year.

NOTES ON THE DATA
†C67 (bladder cancer) includes neoplasms of uncertain or unknown behaviour together with invasive cancers.

SOURCE OF POPULATION
Census data from the Basque Institute of Statistics (EUSTAT). Official census data were used for 1986, 1991, 1996, 2001, 2006, and 2011. Intercensal data were estimated by the registry by linear interpolation, and the 2012 population was calculated by linear extrapolation using the 2006 and 2011 populations.

SOURCE OF POPULATION

Population of the two islands covered by the Gran Canaria and Tenerife registry, jointly, estimated at 1 July each year. Geometric interpolation was used by the registry, because no figures were available from the Spanish National Statistics Institute (INE) for the islands separately as at 1 July. For the calculation, the following were used: (i) the 1991 census; (ii) the municipal register as at 1 May 1996; (iii) as of 1999, the municipal register continued as at 1 January each year.

SOURCE OF POPULATION
Estimates for the island of Mallorca from data published by the Balearic Islands Statistics Institute (IBESTAT) and by the Spanish National Statistics Institute (INE) for the whole Balearic Islands. Population data are calculated for Mallorca from Balearic intercensal estimates (1981 and 1991 censuses) until 2000, and estimates from the 2001 and 2011 censuses provided by INE.

Average annual person–years by sex and age group

SOURCE OF POPULATION
Mid-year population and migration estimates produced by the Northern Ireland Statistics and Research Agency (NISRA; www.nisra.gov.uk/demography/default.asp17.htm). Estimates refer to the population at 30 June each year (mid-year estimates). Population estimates derived using the cohort-component method, which updates the latest census estimates by "ageing on" populations and adjusting for births, deaths, and migration. Population statistics benchmarked to the results of the 2011 census.

NOTES ON THE DATA
†C67 (bladder cancer) includes neoplasms of uncertain or unknown behaviour together with invasive cancers.

SOURCE OF POPULATION
Based on data from the Australian Bureau of Statistics. Population estimates are derived by bringing forward the base (censal) population by ageing the base, and then adjusting for births, deaths, and overseas and interstate migration.
